

QPS Autoradiography photo was featured by Fox News

(March 31, 2010) Newark, Delaware – QPS is pleased to announce one of our scientific pictures was chosen by Fox News to be in The Best Science Photos of the Week (Week of March 29, 2010). This photo illustrates one of the many applications of microautoradiography in drug discovery and development. Microautoradiography has been one of the main focuses of our DMPK group.

A screenshot of a Fox News website article. At the top left is the Fox News logo. A navigation bar contains links for HOME, U.S., WORLD, BUSINESS, POLITICS, ENTERTAINMENT, LEISURE, HEALTH, SCITECH, OPINION, SPORTS, and ON AIR. The main heading is 'EyePoppers: The Best Science Photos of the Week'. Below this is a sub-heading 'Rat Hair Glands -- Yes, Rat' and a paragraph of text explaining the image. The image itself is a microautoradiography photograph showing a cross-section of a rat's hair shaft with dark, radiolabeled regions. Three black arrows point to these dark spots. Below the main image is a row of seven smaller thumbnail images. At the bottom of the page is a footer with various links and a copyright notice for 2010 FOX News Network, LLC.

At QPS, we provide a full range of autoradiography services:

- Quantitative and qualitative whole body tissue distribution studies
- Predictions of human radioactive dosimetry for clinical radiolabeled mass balance studies
- Qualitative micro-autoradiography coupled with quantitative autoradioluminography

Congratulations to Eric Solon, Ph.D., and Paul Strzemienski for making Fox News.
