

### **QPS Pharmaceutical Services Announces Official Name Change**

**(December 4, 2007) NEWARK, Del.** – QPS, LLC, a full-service GLP-compliant contract research organization providing testing services to support preclinical and clinical research and development, announced today its formal name change to QPS, LLC.

The company commissioned independent market research to evaluate the pharmaceutical research industry's recognition and perception of both the QPS Pharmaceutical Services and QPS names.

The name change to QPS supports the company's mission to provide meticulous quality, performance driven by an adherence to client timelines and impeccable client service.

“The acronym QPS has been used for some time when referring to our organization and it embodies our value proposition,” said Dr. Ben Chien, president and CEO of the privately held, Delaware-based firm. “Clients come to QPS for access to seamless and efficient preclinical and clinical research. Our facilities worldwide, combined with local experience and a strong commitment to excellent client service, allow QPS to consistently deliver quantifiable results.”

Founded in 1995, QPS has bioanalytical and DMPK facilities at its Newark, Delaware, headquarters and a bioanalytical laboratory in Taipei, Taiwan. Regional sales offices are maintained in Boston, Connecticut, Pennsylvania, California, New Jersey and Texas. QPS provides quality services in drug quantitation using three technology platforms (LC-MS/MS, ELISA, hybridization ELISA). In addition, QPS offers services in immunogenicity testing, ADME, PK, protein binding, whole body autoradiography, in vivo/in vitro drug metabolism, protein biomarkers and genomic biomarkers to its clients worldwide.
