

WHO WE ARE

Background

QPS is a global contract research organization (CRO) providing discovery, preclinical and clinical drug development services since 1995. Our mission is to accelerate pharmaceutical breakthroughs across the globe by delivering custom-built research services. An award-winning leader focused on bioanalytics and clinical trials, QPS is known for proven quality standards, technical expertise, a flexible approach to research, client satisfaction and turnkey laboratories and facilities. We are passionate about our work, creating value for patients and customers while generating opportunities for employees to thrive.

QPS Values

Integrity

We keep promises and build trust through honesty, proactive communication and reliability.

Quality

We bring the highest level of technical expertise and judgment to our work.

Customer Focus

We tap our global resources to provide service that is fast, flexible and integrated.

Commitment

We work hard to solve problems and deliver results.

People

We treat people with dignity, respect and fairness, and embrace our differences.

Culture

We are friendly and fun. We provide opportunity to grow, value loyalty and teamwork, and recognize and reward performance.

CELL THERAPY SERVICES

Agility. Flexibility. Speed.

LEUKOPAKS

Product	Price
Fresh Leukopak 2.5B	\$1,999.00
Fresh Leukopak 5B	\$2,499.00
Fresh Leukopak 10B	\$3,499.00
CRYO Leukopak 2.5B	\$3,050.00

PBMCs

Product	Price
10M PBMC	\$150.00
25M PBMC	\$225.00
50M PBMC	\$325.00
100M PBMC	\$650.00

MOBILIZED LEUKOPAK

Mobilization Protocol	Price
G-CSF	Inquire
Plerixafor	Inquire
G-CSF + Plerixafor	Inquire

SERVICES

Cell & Sample Processing

- ▶ PBMC Isolation: High-yield, high viability isolation from customer material
- ▶ Immune Cell Enrichment/Depletion: CD3⁺, CD4⁺, CD8⁺, NK, CD34⁺, monocytes (CliniMACS Prodigy)
- ▶ Cell Washing & Buffer Exchange: Custom formulation & concentration
- ▶ Cryopreservation: Cryovials or bags with controlled-rate freezing

Analytical & QC Testing

- ▶ Cell Count & Viability: NucleoCounter precision counts
- ▶ CBC Panel: Hematology readout (WBC, RBC, Hgb, PLT)
- ▶ RNA/DNA Integrity: RIN/DIN scoring with Agilent Bioanalyzer
- ▶ Protein & Nucleic Acid Extraction: Automated KingFisher Duo processing
- ▶ QC Panel Bundles: Combine assays for streamlined verification
- ▶ qPCR: Quant Studio 12k with Accufill System
- ▶ ELISA Assays: Molecular Devices iD5e

Lab Access (Core Facility Style)

- ▶ Certified BSC hoods
- ▶ Centrifuges
- ▶ QC Instruments
- ▶ Process development instruments
- ▶ Virtual Lab (We run your experiments, your way, and provide the data)

Pilot Runs & Method Development

- ▶ Cell Processing Pilots: Test your workflow on a small scale
- ▶ Workflow Validation: Optimize yields, QC, and cryo protocols
- ▶ Custom Protocol Development: Tailored processing methods

Blood and Biofluid

All products are collected from donors who gave consent using an IRB approved Informed Consent.

Products are Research Use Only (RUO)

Product	Price
Whole Blood (10mL)	\$150.00
Whole Blood (Bag)	\$1,125.00
Plasma (10mL)	\$75.00
Serum (10mL)	\$125.00
Buffy Coat (1 Sample)	\$675.00
Urine (10mL)	\$50.00
Custom Collection	Inquire

Criteria

- ▶ Whether you want to receive the samples fresh or frozen
- ▶ Choose your anticoagulant (if applicable)
- ▶ Any donor specific criteria or pooling (additional charges may apply)
- ▶ When you want to receive the samples
