

Why QPS?

Agility. Flexibility. Speed.

A dedicated team supports each clinical study, designing custom-built solutions just for you.

Bioanalytical support from preclinical through clinical programs designed with your goals in mind.

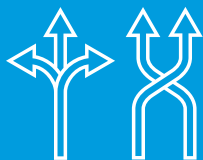

At QPS, all Preclinical, Bioanalytical and Clinical programs benefit from one dedicated Project Manager who provides agility, flexibility and speed to every study.

Agility

Navigate complex studies with confidence

QPS leverages scientific expertise, experienced teams and established regulatory relationships to quickly identify and execute the most appropriate path for your study.

Flexibility

Solutions built around your program

Whether you need a single service or an end-to-end partner, QPS designs therapy area specific custom-built solutions to fit your goals, timelines, and stage of development.

Speed

Your timeline is our timeline

QPS appreciates the need for speed, while maintaining total dedication to accuracy. Our dedication to you and your project ensure we deliver results within your study timelines.
